T2HK-01S0749-1

TITLE OF INVENTION: APPARATUS AND METHOD FOR HEAD POSITIONING CONTROL IN DISK DRIVE

APPLN. TYPE	SMALL ENTITY	ISSUE FEE	PUBLICATION FEE	TOTAL FEE(S) DUE	DATE DUE
nonprovisional	NO	\$1330	\$300	\$1630	09/28/2004

THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. <u>PROSECUTION ON THE MERITS IS CLOSED</u>. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE REFLECTS A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE APPLIED IN THIS APPLICATION. THE PTOL-85B (OR AN EQUIVALENT) MUST BE RETURNED WITHIN THIS PERIOD EVEN IF NO FEE IS DUE OR THE APPLICATION WILL BE REGARDED AS ABANDONED.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status is changed, pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above and notify the United States Patent and Trademark Office of the change in status, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check the box below and enclose the PUBLICATION FEE and 1/2 the ISSUE FEE shown above.

☐ Applicant claims SMALL ENTITY status. See 37 CFR 1.27.

II. PART B - FEE(S) TRANSMITTAL should be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). Even if the fee(s) have already been paid, Part B - Fee(s) Transmittal should be completed and returned. If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

PART B - FEE(S) TRANSMITTAL

Complete, and send this form, together with applicable fee(s), to: Mail

Mail Stop ISSUE FEE **Commissioner for Patents** P.O. Box 1450 Alexandria, Virginia 22313-1450

or <u>Fax</u> (703) 746-4000

INSTRUCTIONS: This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 4 should be completed where appropriate. All further correspondence including the Patent, advance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for

maintenance fee notifications. CURRENT CORRESPONDENCE ADDRESS (Note: Legibly mark-up with any corrections or use Block 1)

909

7590

06/28/2004

PILLSBURY WINTHROP, LLP P.O. BOX 10500 MCLEAN, VA 22102

Note: A certificate of mailing can only be used for domestic mailings of the Fee(s) Transmittal. This certificate cannot be used for any other accompanying papers. Each additional paper, such as an assignment or formal drawing, must have its own certificate of mailing or transmission.

Certificate of Mailing or Transmission

I hereby certify that this Fee(s) Transmittal is being deposited with the United States Postal Service with sufficient postage for first class mail in an envelope addressed to the Mail Stop ISSUE FEE address above, or being facsimile transmitted to the USPTO, on the date indicated below.

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)

(application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 455 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 455 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) system (http://pair.uspto.gov).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (703) 305-1383. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

1. Claims 1-17 are allowed as the prior art does not teach or suggest the applicant's invention.

Independent claim 1 teaches a system for head positioning control. The distinguishing elements of the claim are: an adaptive learning means for acquiring a runout component that is included in the position error and synchronous with a rotation of the disk; means for calculating a feed forward value used to suppress the runout component acquired by the adaptive learning means; means for generating, from the feed back value and the feed forward value, a control amount used to position the head in the target position; and a determination means for selecting, from memory, one of the initial values, used in adaptive learning by the adaptive learning means, in accordance with the target position, and supplying the selected initial value to the adaptive learning means.

Independent claim 9 teaches a system for head positioning control. The distinguishing elements of the claim are: an adaptive learning means for acquiring a runout component that is included in the position error and synchronous with a rotation of the disk; means for calculating a feedforward value used to suppress the runout component acquired by the adaptive learning means; means for generating, from the feedback value and the feedforward value, a control amount used to situate the head in the target position; a determination means for estimating a value of the runout component in the target position, on the basis of the target position and the runout characteristic information stored the memory, and supplying the adaptive learning means with

Application/Control her: 10/059,156

Independent claim 14 teaches a disk drive apparatus. The distinguishing elements of the claim are: an adaptive learning means for acquiring a runout component that is included in the position error and synchronous with a rotation of the at least one disk; means for calculating a feedforward value used to suppress the runout component acquired by the adaptive learning means; means for generating, from the feedback value and the feedforward value, a control amount used to position the at least one head in the target position; determination means for selecting, from memory, one of the initial values, used in adaptive learning by the adaptive learning means, in accordance with the target position, and supplying the selected initial value to the adaptive learning means.

Independent claim 15 teaches a disk drive apparatus. The distinguishing elements of the claim are: an adaptive learning means for acquiring a runout component that is included in the position error and synchronous with a rotation of the at least one disk; means for calculating a feedforward value used to suppress the runout component acquired by the adaptive learning means; means for generating, from the feedback value and the feedforward value, a control amount used to position the at least one head in the target position; and a determination means for estimating a value of the runout component in the target position, on the basis of the target position and the runout characteristic stored in the memory, and supplying the adaptive learning means with the estimated value

of the runout component as an initial value necessary for adaptive learning executed by the adaptive learning means.

The above claims are interpreted by the Examiner to fall within the provisions of 35 U.S.C. 112, 6th para.

The portion of the Specification relating to the adaptive learning means is described at page 15, lines 6-24 as a runout detector that obtains the runout component of the position error "e" by adaptive learning

The portion of the Specification relating to a means for calculating a feed forward value to suppress the runout component acquired by adaptive learning means is described at page 15, line 25 to page 16, line 24.

The portion of the Specification relating to a means for generating from the feedback and feedforward values, a control amount to be used to position the head in the target position is described at page 21, line 10 to page 22, line 5.

The portion of the Specification relating to a determination means for selecting from memory one of the initial values used in adaptive learns is described at page 33, line 21 to page 35, line 25.

Therefore, the claims are construed to cover the corresponding structure, material, or acts described within the Specification.

Independent claims 16 and 17 teach methods of executing head positioning. The distinguishing elements of the claims are: calculating a feedforward value to suppress the runout component acquired by the adaptive learning; and generating, from the feedback value and the feedforward value a control amount used to position the head in the target position.

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mitchell R Slavitt whose telephone number is (703) 305-2809. The examiner can normally be reached on M-F (6:30-4:00), 2nd Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David R Hudspeth can be reached on (703) 308-4825. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pairdirect.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (tollfree).
